

SEO Audit

This SEO audit was conducted to evaluate the current search engine optimization performance of the Cybaem Tech website. The audit focuses on key areas including on-page SEO, content optimisation, keyword implementation, and user experience improvements.

The website has a strong foundation in terms of service offerings and branding. However, several optimisation opportunities have been identified that can improve search visibility, user engagement, and overall organic performance

Observations

Date	May 25, 2026	
Meta Title Optimisation	The existing homepage meta title exceeds the recommended SEO character limit, which may affect search engine display and click-through rate (CTR).	Suggested Meta Title Cybaem Tech IT, Security & Marketing Services
Focus Keyword Optimisation	Focus Keyword IT Service The focus keyword is currently missing from: • Main heading (H1) • Subheadings (H2/H3) • Some important website sections	SEO Impact Missing keyword placement in headings reduces page relevance for search engines and can impact keyword ranking opportunities.
"Life at Cybaem Tech" Page Audit	• Some images are not loading/displaying properly. • Celebration-related sections contain missing or incomplete visual content. • Overall page content is limited and lacks detailed engagement-focused information.	SEO & User Experience Impact Broken or missing visuals negatively affect: • User experience • Website engagement • Page quality perception • SEO image optimization opportunities
Blog Page Audit	• Blog page currently has limited or missing content. • Regular blog posting strategy is not implemented. • supporting content is insufficient.	SEO Impact Lack of optimised blog content affects: • Organic traffic growth • Keyword ranking opportunities • Website topical authority
