

WHO WE ARE

Cybaem Tech is an **ISO 27001 & 27017-certified** global technology partner delivering enterprise software, AI-powered web platforms, IT staff augmentation, managed cloud security, and digital growth solutions. We work with mid-market and enterprise clients across manufacturing, pharma, FMCG, and services — building systems that eliminate bottlenecks and accelerate growth. Every engagement runs under a strict **requirement-freeze / zero-scope-creep protocol** with senior engineers as your single point of contact.

A. 2026 FEATURED PRODUCT DEVELOPMENT

Live Interview Psychometric Analysis System

25% IN PROGRESS

AI · HR Tech · Psychometrics

- Generative AI Synthesis**
Auto-synthesises multi-modal psychometric data into hiring rubrics & personalised candidate feedback reports.
- Enterprise ATS Integration**
Bi-directional API integrations with leading ATS platforms to automate top-of-funnel screening workflows.
- Continuous Learning & Bias Mitigation**
Feedback loops for rigorous bias mitigation and dynamic baseline calibrations across global applicant pools.

Business Card OCR & Extraction System

80% NEAR COMPLETE

OCR · Gen AI · CRM Automation

- AI-Driven Follow-Up Generation**
Gen AI drafts hyper-personalised follow-up communications automatically from newly digitised contact profiles.
- Zero-Touch CRM Workflows**
Auto-routes leads and triggers sales sequences in enterprise CRMs and PM ecosystems upon card capture.
- Edge Computing for Offline Capture**
On-device extraction with no internet dependency — high-fidelity OCR in any networking environment.

Cybaem Nexus CMS

100% LIVE IN USE

Gen AI · CMS · ERP · ATS

- Omnichannel Lead Capture**
Funnels & tracks leads from LinkedIn, Facebook, Instagram and direct contact forms into a unified pipeline.
- Integrated ERP & ATS**
Full resource planning application with automated resume management and candidate tracking built-in.
- Dynamic AI Content Management**
Generative AI-powered publishing for blogs, media, and website content — powering cybaemtech.com live.

B. OTHER INTERNAL PRODUCTS

Billing Application

Internal invoicing & billing management system integrated with Cybaem's financial workflows.

Finance · Internal

ReqGen

Audio-based requirement generator — converts spoken briefs into structured project requirement documents using AI.

Voice AI · Requirements

License Management System

Licence tracking and management integrated directly with Zoho Books for automated renewals and compliance.

Zoho · Compliance · SaaS

C. HEAVY WORKING PROTOTYPES

#1 SEC EDGAR & Stock Market Research App

Python · React · REST API · Real-Time Data

Web application enabling investors to search U.S. company financial reports (SEC EDGAR) and check live Indian stock prices in one unified interface. Backend in Python, frontend in React — fetches and displays real-time multi-source data instantly.

#2 Financial Data API Platform

Python / FastAPI · React · REST Endpoints · Market Data

REST API platform aggregating U.S. company financial reports and live Indian stock market data into a single developer-ready interface. FastAPI backend with React frontend — built for investors and analysts to research companies and track stocks in one place.

D. 2026 PRODUCT COMPLETION TRACKER
